

# PerfectSearch

Innovation in Search Technology

“The next generation of enterprise search”

“A quantum leap forward”

“A significant breakthrough in search technology”

“Able to perform where others fail”

“Game changing”

# Perfect Search is *the* new search technology!

- New approach and innovation
  - Solving the dilemma of accelerating growth of enterprise data
  - Setting new expectations for speed
- Enhancing the value of existing solutions

**Why do we need  
*another*  
search engine?**

# Because Perfect Search *IS* different!

- So fast that more iterations improve relevance
- So scalable that terabyte and larger data sets become routine
- So robust and stable that systems availability has a new standard of excellence
- So efficient that capital and support costs are slashed

**The exciting thing is  
what Perfect Search  
can do for existing  
applications and  
integrator offerings!**

# Perfect Search *ADDS VALUE!*

- **Applicable across all search disciplines**
  - **Easily installed and integrated as a system appliance**
  - **Massive scalability extends the function of existing systems and reduces total cost of ownership**
- **Value proposition makes its use compelling**
